

## Release! First Museum Visit after Covid restrictions lifted

On Tuesday 17<sup>th</sup> August 2021 a group of 8 BCH members visited the current sculpture exhibitions at the 'Beelden aan Zee' museum. We are all very grateful to Teresa Weersma for organizing this and the for the post-museum visit to the 'Paviljoen de Witte' next door for drinks. There were no museum guides available but John had provided each of us with a sheet containing the potted biographies of the 4 artists as found on the museum website:- Igor Mitoraj, Paul Grégoire, Peitro Cascella aand Cordelia van den Steinen. It was a delight to wander around everything from large bronzes to small terracotta figures. John's experience of dance medicine led him to point out a Greek toe! The sculptor IM had a fixation with bandages and mythology. Yes, it was modern sculpture and more recent than this you could hardly expect: a note from Greta Thunberg was included in a terracotta tile by CvdS!
